INFO4555 5556 Team Project

Milestone 3 Final

Milestone 3 is the final milestone of the team project, worth 100 points. Milestone 3 consists of 4 components for INFO4555 students and 5 components for INFO5556 students:

- Documentation – updated from Milestone 2 to reflect your final data model, data dictionary, etl source-to-target mapping, understanding of requirements, and assumptions. Should match your final delivered data model you build in class database.
- Populated dimensional data model in your team's database account. (if all feedback from milestone 2 was positive related to your data model and data, there is nothing to do here) If you received feedback on issues related to your milestone 2 ETL work, they should be resolved.
- Working Tableau Workbook(s) (may have multiple workbooks to show customers multiple options). Review the requirements and really explore the data to identify any trends around the two price hikes and related dimensionality.
- ePortfolio completed for your team's project (only teams with members registered in 5556)
    - INFO5556 students have a separate grading component for the ePortfolio site worth 50 points. This is not extra credit, the 5556 total possible class points is 1050 versus 1000 for INFO4555.
    - Under "project files" see "Creating portfolio for group project – instructions"
- Presentation to project sponsors (These will be lightning round style. Limited to 3 minutes per team) – Odd numbered teams (Team01,03,..)will present on December 2nd, Even numbered teams (Team02,04…) will present on December 4th.
    - Presentation of your BEST Tableau visualizations and any interesting findings.
    - Use this limited 3 minute presentation to impress the sponsor with your unique visualizations and findings.
    - Either upload your slides as a PDF to Canvas, or submit a url in the Canvas assignment as a comment.

Each team member should complete the "Self and Peer Evaluation" survey found in the Quizzes section of our Canvas site.

Turning your work in:

The project milestones are tied to your team groups in Canvas. Only one member from each team needs to upload their milestone 3 documents.

Required:

1. Single file containing updated, final, documentation in pdf format.
2. Tableau workbook file(s), you may have more than one.
3. Presentation slides either upload pdf version, or submit url as comment.
4. ePortfolio site (if any INFO5556 team members) should be published and open to public, so I can view, and it may be shared with sponsors. Please submit the ePortfolio url as a comment.
