WhereScape Repository Setup

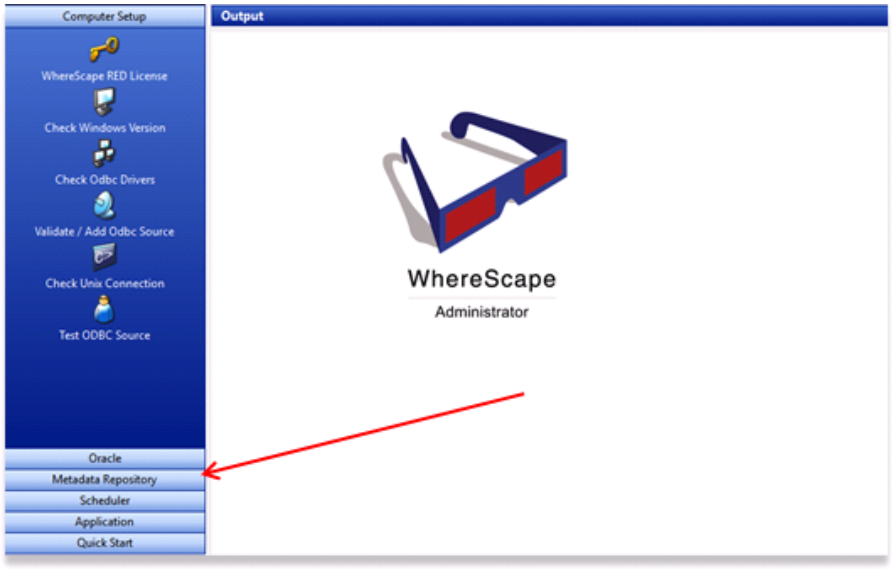

This document provides step-by-step instructions for setting up a WhereScape RED repository. You will need to do this setup for your netid database account, only once. Similarly, someone on your project team will need to setup your team account later in the semester, using these same steps.

From your AppStream, select the “Setup Administrator” (blue sunglasses)

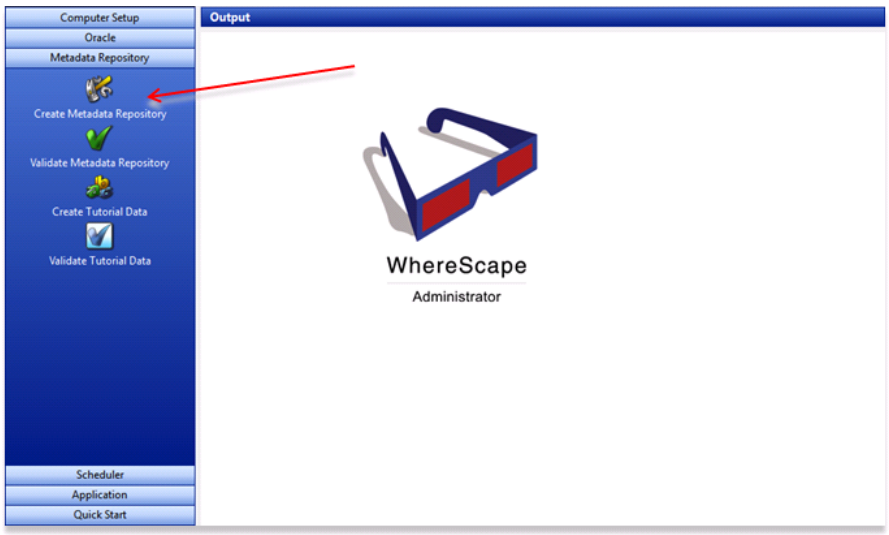

WhereScape Repository Setup

Click on “Metadata Repository”

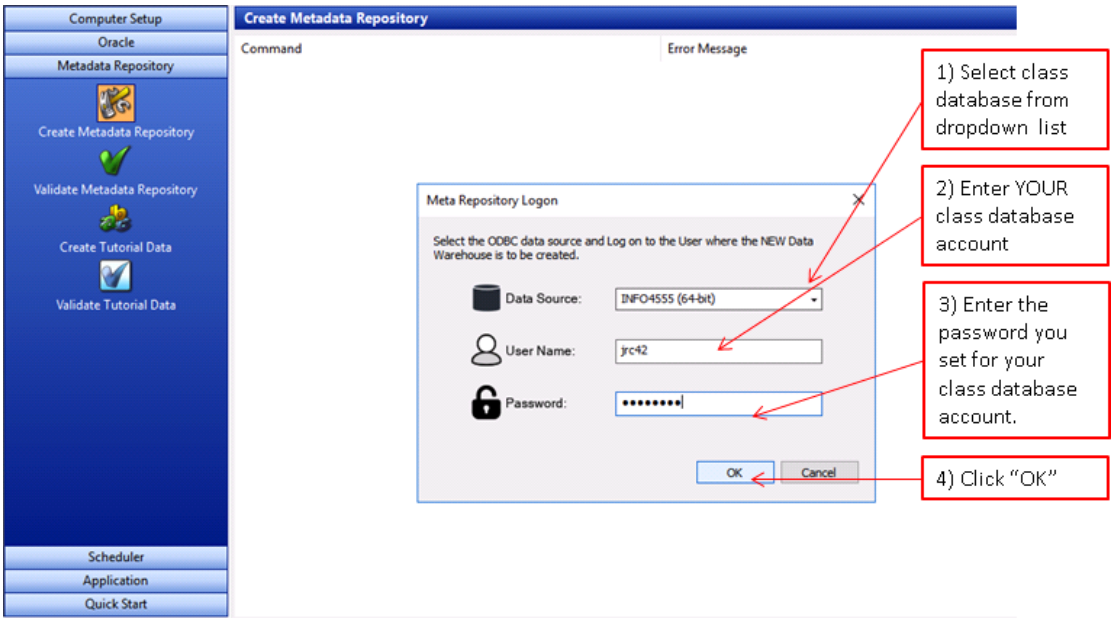

Click on “Create Metadata Repository”

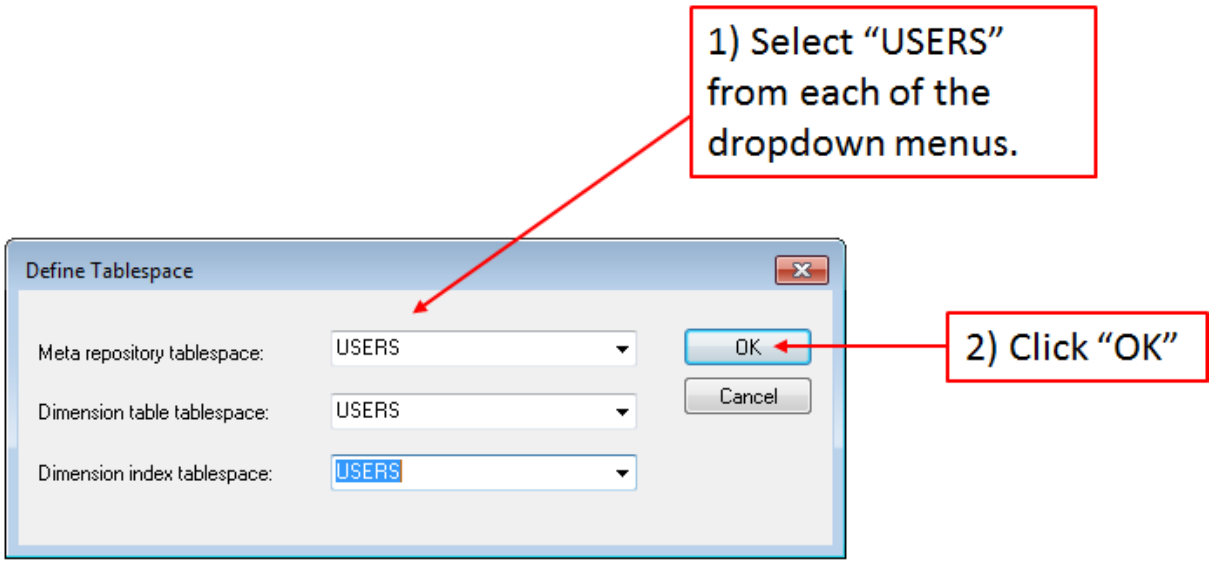

WhereScape Repository Setup

Complete the ODBC Connection information and click “OK”.

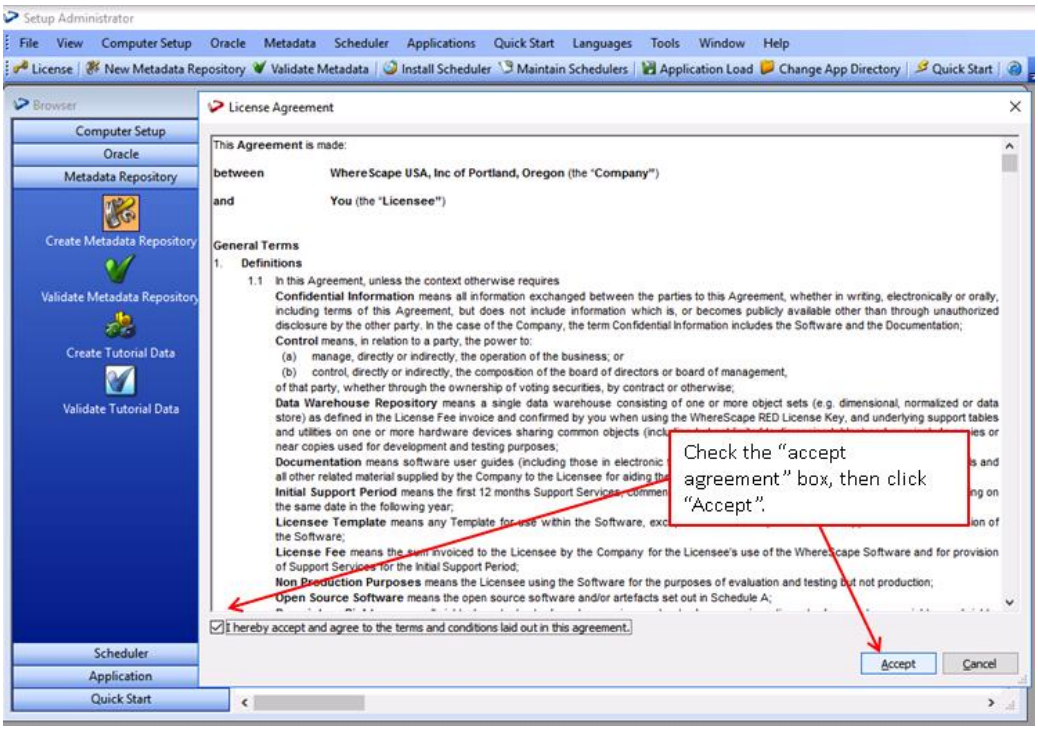

Choose the Database Tablespaces to create your various table types in. For the class you only have one tablespace available, named “USERS”. Select “USERS” in all 3 dropdown menus and click “OK”.

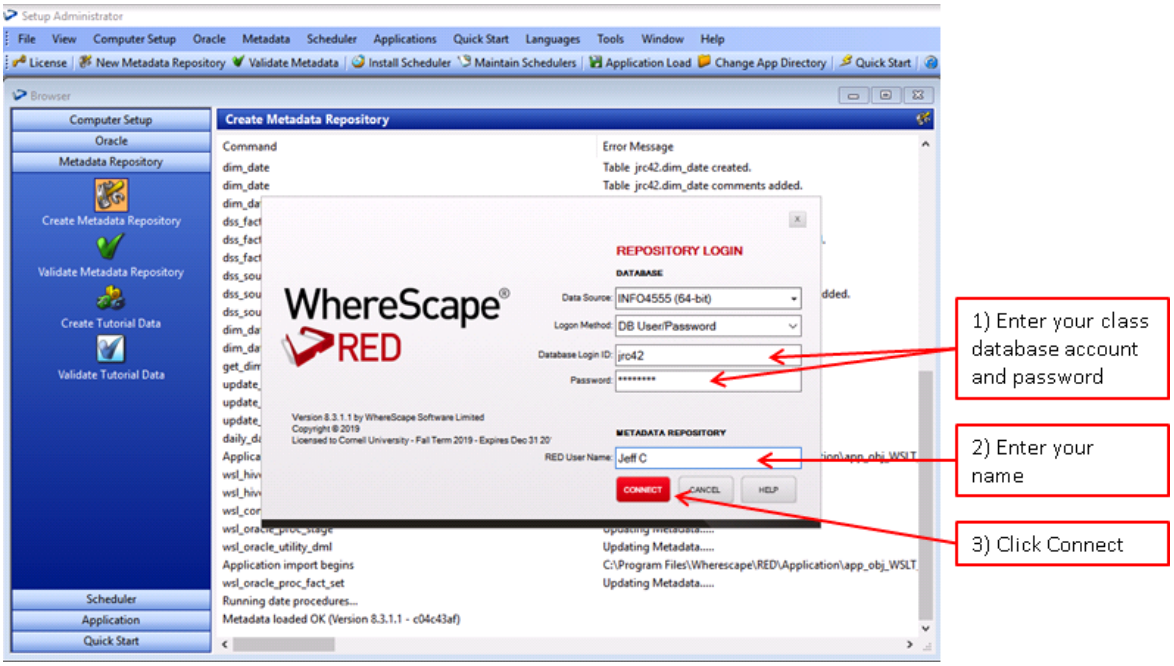

WhereScape Repository Setup

You will see many log messages as the WhereScape repository tables, views, stored procedures, etc are built in your database account.

After the repository build completes, you may be prompted to accept the license terms.

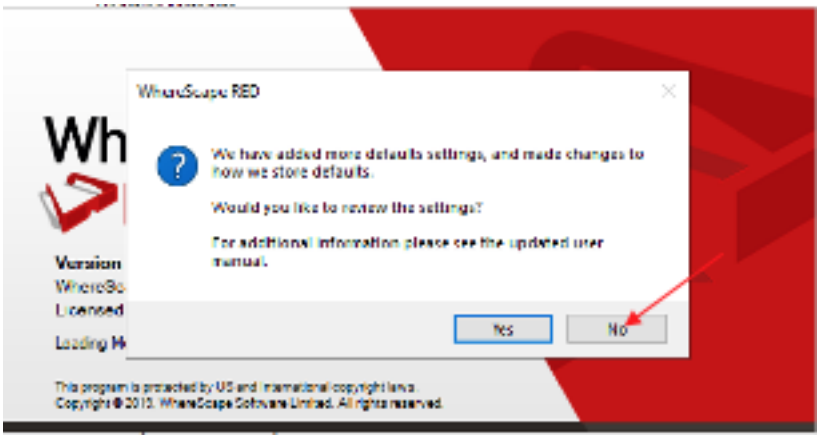

Next, you will be prompted to logon to WhereScape RED.

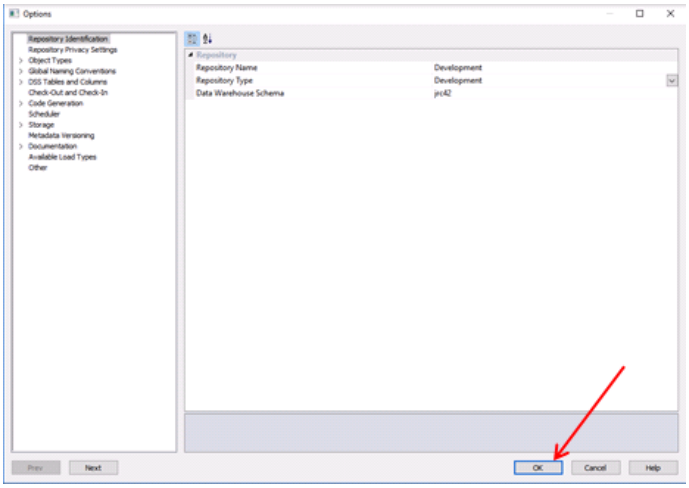

WhereScape Repository Setup

You will be asked to review settings. Simply select “No”.

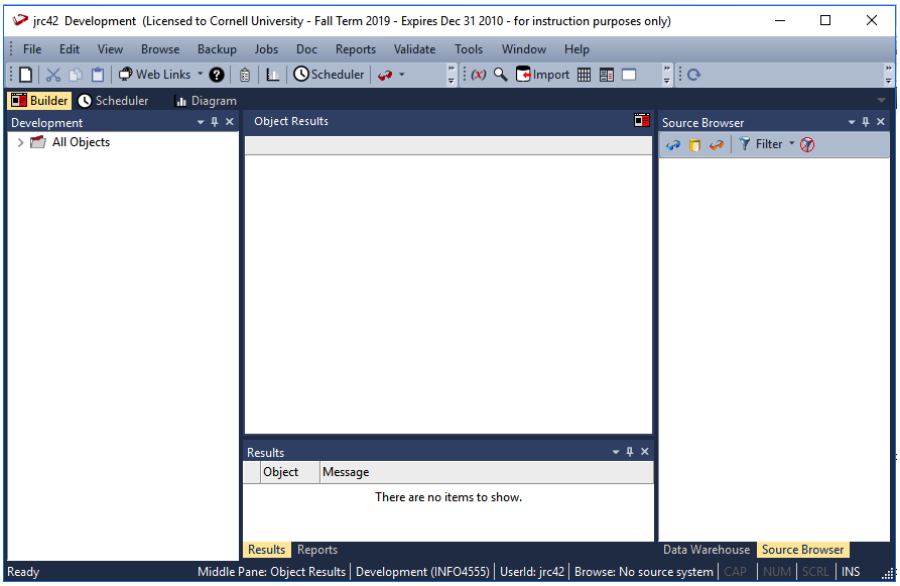

The following page will pop up asking about options. Simply click “OK”.

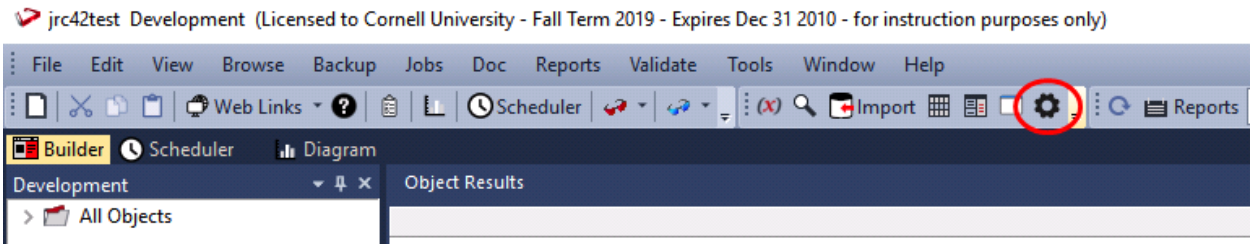

WhereScape Repository Setup

You should now be in the WhereScape RED Development console.

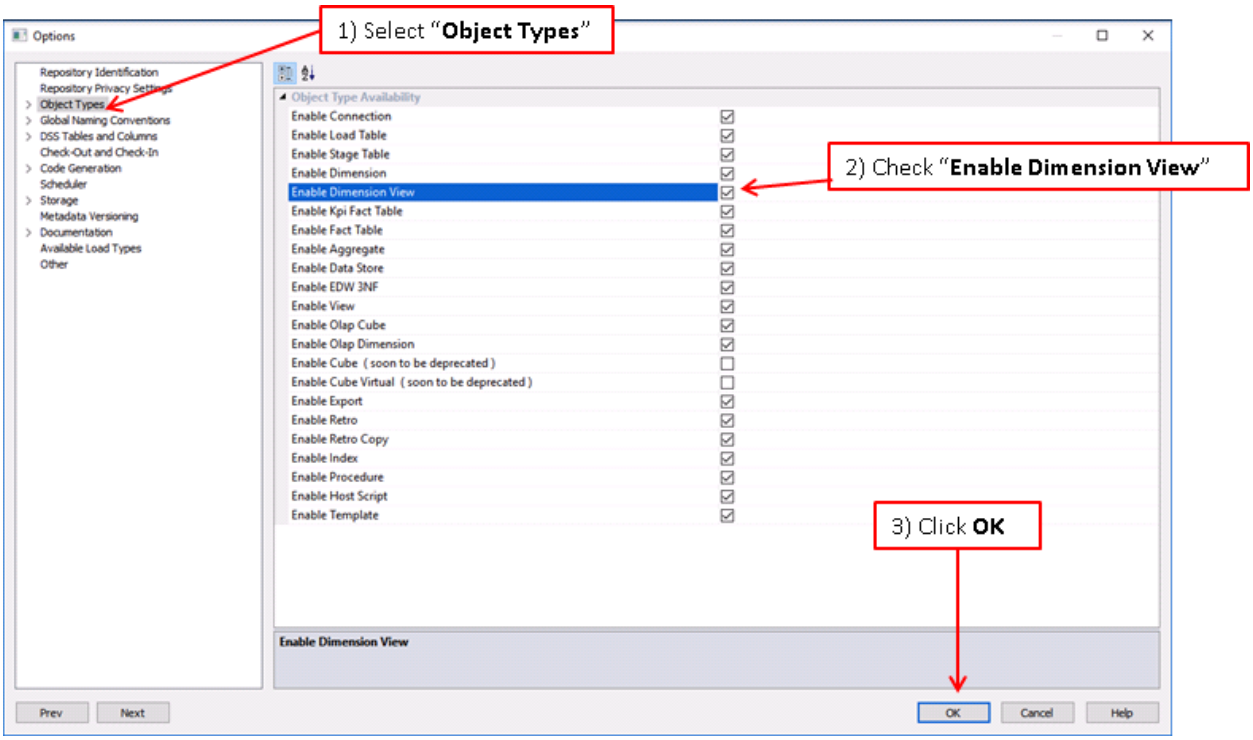

Next you will need to make a one time configuration change to enable “Dimension Views” this is a feature which allows the creation of Dimension role play views, which will be needed for the WhereScape assignment.

Start by selecting the options icon.

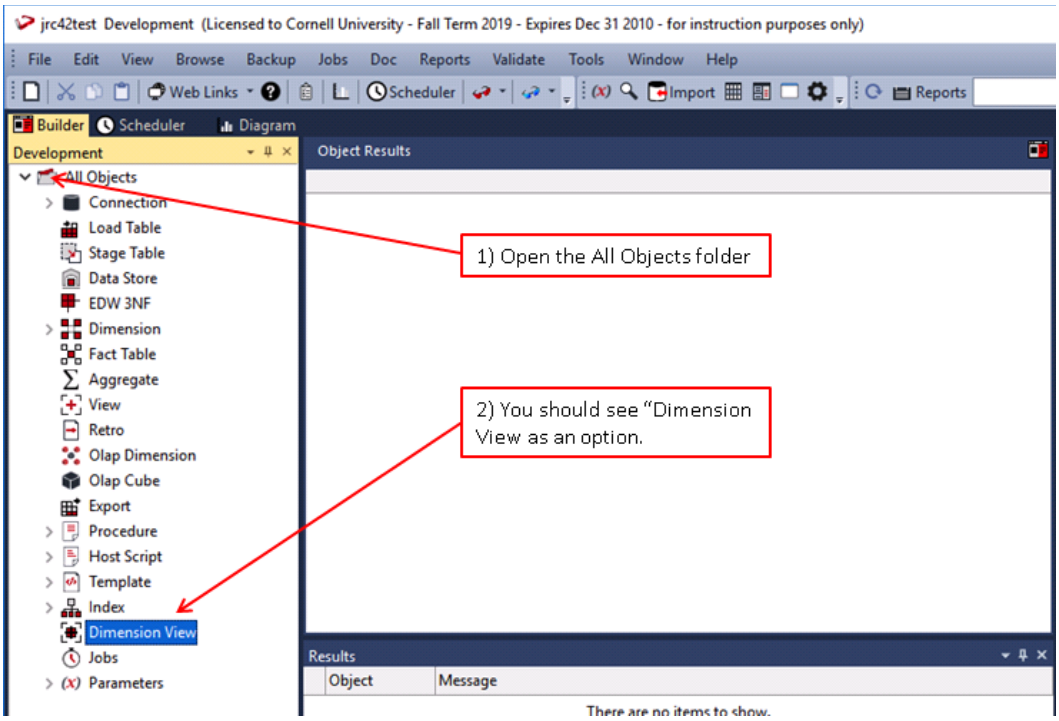

WhereScape Repository Setup

From the options panel, select “object types”. You will see “Enable Dimension View” is not checked. Please check this option, then click OK.

WhereScape Repository Setup

Unfortunately, in order for this configuration change to take effect, you will need to log out of WhereScape RED, then log back in. Once logged back in, verify the Dimension View type is an option under the “All Objects” folder.

You are now ready to proceed with the WhereScape RED tutorial / assignment. Note that the repository setup is a one-time process. Simply logon to WhereScape RED (the RED sunglasses) going forward.
