SQL Exercise 3 Worksheet

Q1) Now we are down to a single result set. What is the DM_NAME for the production system which uses the database_user WDDW?

A1) WDDW PROD

Q2) How many records were in the Data Warehouse in March 2015?

A2) 773299244

Q3) How many records were in the Data Warehouse in June 2015?

A3) 809525025

Q4) What is the record count returned by this query?

A4) 9975481676

Q5) Why does this number not accurately reflect the number of records in the data warehouse?

A5) it sums the row_counts from all 12 monthly snapshots in 2015, counting the records multiple times instead of providing the count at a single point in time.

Q6) Which of the data marts had the lowest number of records in March 2015?

A6) EMN PROD, only 75586

Q7) How many records were in the GL_DETAIL_FC table in March 2015?

A7) 42874496

Q8) What was the record count for GL_DETAIL_FC in January **2014**?

A8) 31045024

Q9) What was the longest "full_load_time" during the month of March, 2015?
A9) 550

Q10) Which Data Mart (DM_NAME) had the lowest average load time for February, 2013?
A10) FIKFSD 11G PROD, only 5 avg

SQL Exercise 3 Worksheet

Q11) What was the shortest_full_load_time for the CR PROD data mart February 2015?

A11) 147

Q12) Write the SQL to produce the following result set. *(The column names, values, and record order should match).*

	CAL_YEAR	CAL_MONTH_NO	CAL_MONTH_NAME	DM_NAME	TOTAL_POST_PROCESS_TIME	NUM_OF_LOADS	POST_PROCESS_TIME_AVG
1	2014	1	JAN	SA PROD	1777	21	85
2	2014	2	FEB	SA PROD	1628	19	86
3	2014	3	MAR	SA PROD	1597	20	80
4	2014	4	APR	SA PROD	1716	21	82
5	2014	5	MAY	SA PROD	1655	20	83
6	2014	6	JUN	SA PROD	1832	22	83
7	2014	7	JUL	SA PROD	1985	23	86
8	2014	8	AUG	SA PROD	1780	20	89
9	2014	9	SEP	SA PROD	1761	19	93
10	2014	10	OCT	SA PROD	2247	23	98
11	2014	11	NOV	SA PROD	2018	20	101
12	2014	12	DEC	SA PROD	2407	23	105

Past SQL here)

```
SELECT dt.cal_year, dt.cal_month_no, dt.cal_month_name, dm.dm_name,
SUM(lt.post_process_time) total_post_process_time, count(1) num_of_loads,
ROUND(SUM(lt.post_process_time)/count(1)) post_process_time_avg FROM
ODAAMETRICS.load_times_fc lt, ODAAMETRICS.dim_date dt,
ODAAMETRICS.datamart_dm dm WHERE lt.dim_date_key = dt.dim_date_key and
dm.dm_name_id = lt.dm_name_id and dt.cal_year = 2014 and dm.dm_name = 'SA PROD' group
by dt.cal_year, dt.cal_month_no, dt.cal_month_name, dm.dm_name order by dt.cal_month_no;
```
